Art Unit: 1714

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-26, 29-37, 39-41, 43, 45-46, 48-76, 78-86, 88-90, 92, 94-95 and 97 are rejected under 35 U.S.C. 102(b) as clearly anticipated by EP 520 186.

3. The European Patent discloses flame retardant polycarbonate compositions comprising polyorganosiloxane polymer a phosphorus compound, a boron compound and a fluoropolymer antidrip agent corresponding to those of the present claims. The components are employed at amounts which directly overlap the weight ratio of component of applicant's claims. No patentable difference is readily ascertained. See pages 2-5.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-98 are rejected under 35 U.S.C. 103(a) as obvious over EP 520 186 as applied to claims rejected above.

6. The EP patent indicates that additional additives may be included in the compositions. The incorporation of a polyfunctional alcohol into the compositions of the EP patent would have been obvious to one of ordinary skill in the art at the time of applicant's invention, absent a clear showing of unexpected results attributable to such a variation.
